EDISON, NEW JERSEY 08837

October 15, 1991

Mr. Bill Denininger
Contract Administrator
Metcalf and Eddy
303 South Broadway
Suite 318N
Tarrytown, NY 10591

Dear Bill,

This letter will confirm our recent phone conversation regarding the TCLP analysis of the 14 drums of contaminated salts remaining on the Nelson Galvanizing site. The second analysis confirmed that the contents of the 14 drums contain selenium in a concentration that makes the material a RCRA hazardous waste. As such, the waste must be transported by a RCRA permitted transporter to a RCRA permitted disposal site.

Please provide me with the name, address, and ID number for whomever will be transporting the material, as well as for the facility where the material will be disposed. Pursuant to the Administrative Consent Order, the material may not be shipped until I have had an opportunity to verify the compliance status of both the transporter and disposal facility.

Thank you for your continued cooperation in this matter.

Sincerely yours,

Paul L. Kahn
On-Scene Coordinator
Response and Prevention Branch
